

SUNCOAST SCIENCE CENTER
Faulhaber Fab Lab

6th Annual RC CUSTOM CAR OPEN

**Help kids
build skills for life
using makerspace
equipment!**

**Support a
unique program
you won't find
anywhere else!**

**Great
exposure for
you or your
company!**

**Created
for students,
by students!**

Together, we can *drive brighter futures* for our students.

Are you ready to shift into gear and change lives? While there are countless school clubs and extracurricular activities to support for local students, there is no experience quite like RC Car. We've created an environment where...

Experiential learning helps kids build the skills they need to excel in a future that looks very different from today.

Collaboration and innovation reign supreme, allowing kids to develop life skills that are not taught in school—such as creativity, problem-solving and critical thinking!

Kids acquire technical skills through the hands on use of high-tech equipment like laser cutters, vinyl cutters, 3D printers and more.

For students, by students.

RC Car is no ordinary competition. The program is designed and run by a team of talented high school students, providing a unique peer-to-peer learning model you won't find anywhere else. Here, kids who may not have other outlets to explore their interests are empowered to get involved as racers, or leaders. Together, they explore new interests while customizing a remote control car. Through challenges along the way, they learn it's okay to fail at the Fab Lab. Because learning from failure is where the real magic happens.

**Over 130 kids + 10 weeks of hands on workshops
+ 2 custom race tracks + 1 design competition**

= Unlimited learning potential.

“Being on the committee was what really changed my confidence in my creative and collaborative abilities. Thinking back to how uncertain and clueless I was when I first joined, I couldn't express better how much this program has helped me grow. I've absolutely loved every part of it, and the Fab Lab has just been amazing in helping me become a leader.

– Claire Wang, past student RC Car committee member

SPONSORSHIP OPPORTUNITIES

Join us. YOU can make a difference alongside these supporters!

GULF COAST
COMMUNITY FOUNDATION

SWEETSPARKMAN
ARCHITECTURE & INTERIORS

& many more!

- Company name on event signage

We faced a lot of hardships constructing our car but we always enjoy learning from our mistakes and are so excited when we finally get to race our car that took us a long time to make. We love RC Car and appreciate everything that the Fab Lab does for us.

- Faith & Taytum, RC Car participants
